PROFILE

Hi, I'm Neil Pagara, a Computer Engineering graduate and a software engineer from Magsaysay, Misamis Oriental. I'm passionate about contributing to exciting projects and making a positive impact in tech industry.

RELEVANT SKILLS

Flutter Developer	UI / UX Design	Verbal Communication
HTML, CSS	Firebase	Problem-Solving
ReactJs, Tailwind	Front End Development	Computer Literate Leadership
Mobile and Web Development	Team Collaboration	and Management Skills

PROFESSIONAL EXPERIENCE

Agnos GmbH (Switzerland) **Dec 2025 - Present**

Software Engineer

- Designed, developed, and deployed scalable web and mobile applications based on client specifications
- Implemented new features, system enhancements, and third-party integrations to improve application functionality
- Maintained and optimized application performance, ensuring reliability, efficiency, and seamless user experience
- Collaborated with cross-functional stakeholders to define requirements, prioritize deliverables, and meet project milestones
- Delivered clean, well-documented, and maintainable code while providing ongoing technical support and system improvements

EDUQUEST INC **Feb 2025 - Present**

Product and Development Officer

- Designed and implemented intuitive LMS features by brainstorming and translating ideas into practical tools, improving ease of use for both teachers and learners.
- Provided technical assistance, training, and refresher sessions that resulted in smoother LMS adoption and reduced support requests from faculty and students.
- Developed a mobile eBook application using Kotobee Author, giving students easier access to their eBooks and improving learning convenience.
- Managed LMS operations across multiple institutions, ensuring reliable performance, consistent course delivery, and streamlined administration.

FREELANCER **Jan 2023 - Present**

Flutter Developer

- Designed and developed responsive mobile applications tailored to client needs, ensuring seamless performance across devices and platforms, which improved accessibility and user satisfaction.
- Delivered full-cycle development (front-end and back-end), providing robust and scalable solutions that reduced system downtime and enhanced overall efficiency.
- Optimized performance, accessibility, and usability in applications, resulting in improved user experience and higher adoption rates.

FLIGNO SOFTWARE PHILIPPINES, INC **Feb 2024 - Apr 2024**

On the Job Training Software Developer

- Contributed to the development of web applications by coding, testing, and troubleshooting, which helped improve system stability and feature reliability.
- Collaborated closely with the development team to enhance features and optimize application performance, gaining hands-on experience across the full software development lifecycle.
- Improved overall application quality by actively participating in debugging and feature enhancement, supporting smoother deployment and user experience.

PROJECTS

PARA – Ride Hailing App

- Developed a ride-hailing mobile application enabling real-time driver-passenger matching and trip tracking
- Implemented location-based services and GPS integration for accurate navigation and route optimization
- Designed user-friendly interfaces to enhance booking experience and reduce friction in ride requests
- Ensured secure and reliable communication between drivers and passengers within the platform

ISeQR | ISeQRAdmin - Mobile App

- Built a cross-platform safety management system for vehicle tracking using QR code technology
- Developed role-based access control for administrators, drivers, and vehicle owners to manage parking operations
- Implemented secure data storage and real-time logging of vehicle entry and exit activities
- Designed multilingual support (English and Tagalog) to improve accessibility and user adoption

HelpNow - Mobile App

- Developed an emergency alert mobile application that automates SMS notifications to designated contacts
- Integrated real-time GPS location tracking to send accurate coordinates during emergencies
- Implemented configurable contact management for flexible and user-controlled alert systems
- Ensured reliable delivery of time-sensitive alerts with timestamped location data

Zippy Multi-service - Mobile App

- Developed a multi-service mobile application integrating food ordering, ride-hailing, package delivery, and digital payments in a single platform
- Designed and implemented modular service features to support scalable and flexible service offerings
- Built intuitive UI/UX to streamline user interactions across multiple service categories
- Integrated real-time tracking and booking functionalities to enhance service efficiency and user experience
- Implemented secure payment processing and transaction management within the application

CropConnect - Mobile App

- Designed and developed a mobile web application for agricultural data profiling and crop traceability
- Implemented QR code-based tracking to improve transparency across the agricultural supply chain
- Built real-time analytics dashboards to support data-driven decision-making for stakeholders
- Streamlined data management for farmers, vendors, and market administrators through centralized profiles

EduQuest Inc Company Website

- Developed a responsive company website showcasing digital education solutions for Philippine institutions
- Implemented modern UI/UX design to improve user engagement and content accessibility
- Structured and optimized web content for DepEd-aligned K-12 and higher education digital resources
- Ensured cross-device compatibility and performance optimization for a seamless browsing experience

Simul WebApp and Mobile Applications

- Developed a multi-role transportation and mobility platform using Flutter and Firebase/Firestore
- Implemented real-time booking, dispatch, and geofencing features for taxi and shuttle operations
- Built role-specific interfaces for passengers, drivers, kiosks, hotels, airlines, and administrators
- Integrated payment and billing systems, including Stripe, for seamless transaction management
- Designed admin dashboards for managing organizations, users, kiosks, and operational configurations

TVL - COMPUTER SYSTEMS SERVICING **Dec 2019**

NC II Passer

Certified in Computer Systems Servicing, with skills in hardware and software installation, troubleshooting, and basic network setup, ensuring efficient and reliable IT support.

EXTRACURRICULAR ACTIVITIES

Google Developer Student Clubs USTP Innovate Solution Challenge 2023 - Top 8 Finalist
Front end Developer of the Team

Mobile Web Application for Agricultural Data Profiling and Crop Traceability - Thesis Study
Fullstack Developer of the Team

PARA - Proposed Ride-Hailing App for Cagayan de Oro - Start-Up Project
Developer of the Team

EDUCATION

Bachelor of Science in Computer Engineering
